EXPERIENCE

AI Engineer

Hytel

02/2026 – Present Cavite, PH

- Integrated Google Vertex AI to develop AI-powered features, including a Retrieval-Augmented Generation (RAG) system that enabled context-aware responses using company knowledge bases and structured data sources.
- Led the modernization of a legacy application by redesigning core components and introducing AI capabilities, improving application performance and enhancing overall system stability.
- Designed and maintained cloud infrastructure on Google Cloud Platform (GCP), optimizing deployment pipelines and ensuring uptime and security for AI-driven applications.
- Collaborated across the full software development lifecycle (SDLC) for 5 concurrent projects, successfully delivering features from requirements gathering through to post-release maintenance.
- Collaborated with cross-functional teams in an Agile environment, actively participating in sprint planning, daily stand-ups, backlog refinement, code reviews, and iterative feature delivery.

Web Developer

FGP FortuneGod Philippines

09/2026 –01/2026 Pasay, PH

- Led the migration of the website from WordPress to a modern, scalable technology.
- Developed RESTful APIs to support dynamic content, data management, and frontend-backend communication.
- Implemented Git and GitHub workflows for version control, collaboration, and code review.
- Containerized frontend and backend applications using Docker to ensure consistent development and deployment environments.
- Built and maintained CI/CD pipelines using GitHub Actions for automated build, unit test, and deployment

Projects

Switchboard - is a project management app where teams plan, track and run their sprints. AI does the heavy lifting: it plans projects, manages tickets and reports on how sprints are going.

- Led the modernization of Switchboard into an AI-first product.
- Built a Global AI Chat agent with 29 tools.
- Built the AI Project Planner
- Built AI Observability and published it as a npm package
- Built AI Evaluation and an AI Playground

Flinki - is a social app where athletes keep a verified record of their sports achievements, like races, medals and training. It connects to wearables such as Garmin and Apple Health. AI helps athletes find their past results online, write their profile, and turn their stories into achievement posts.

- Led mobile development of the Flutter app for iOS and Android
- Built the AI layer from scratch on Google Vertex AI (Gemini with Genkit).
- Built "Find Me Online," an AI feature that searches the web for an athlete using their profile
- Added AI across the product: speech-to-text and AI-written bios in onboarding, AI-generated images for achievement post.

Education

Bachelor of Science in Information System

Makati Science Technological Institute of the Philippines

09/2021 - 07/2025 Manila, PH

SKILLS

Backend Development

- Node JS, Express, Java, Spring Boot, Python, Fast API, Fastify, Redis, Vertex AI, Genkit

Frontend Development

- NextJS, React JS, HTML, CSS, JavaScript, TypeScript, Vue JS, Redux, Redux Toolkit, Pinia, Tailwind, Bootstrap, Element Plus

Database

- MySQL, MongoDB, PostgreSQL, Firebase Firestore

DevOps / Cloud platforms

- Docker, Kubernetes, Firebase, Google Cloud Platform (GCP), Git, GitHub and GitHub Actions.

Other Skills

- Flutter, Postman, Claude Code, Gemini, Ollama and Codex

Training / Bootcamp

Frontend Web Developer Intern

Digiplus Interactive Corp.

Software Engineering Bootcamp

Hytel

AI Enablement Bootcamp
